PROJECTS

Student Supporting System	Oct-2021 to Dec-2021
<ul style="list-style-type: none">• Student Supporting system is an web based project to help student during their Examination.• It consists of syllabus,notes ,important question and previous year question.• The system is a digital initiative to produce an interface to get access to the study materials.• As a part of team, there are four members. Each assigned a particular tasks regarding the project.• My suspicious role in this project is to create a user-interface via Bootstrap and JQuery.
