---

## Professional Experience

---

### Highcourt lawyer office

Typist (Tamil & English)

present | Madurai

---

## Projects

---

### Intrusion detection System using PCA with Random Forest Approach

Intrusion detection is one of the important security problems in today's cyber world. A significant number of techniques have been developed which are based on machine learning approaches. So for identifying the intrusion we have designed the machine learning algorithms. By using the algorithm we find out intrusion and we can identify the attacker's details also.
